Use of Medicinal Plants in Medieval and Early Modern Times in Japan Focusing on Medicinal Plants in the Genus *Ariasaema*

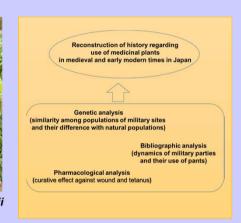

(Prof. Eiji TANESAKA, tanesaka@nara.kindai.ac.jp)

Research Area

- 1. Genetic analysis on population of *Arisaema thunbergii* comparing between military sites and natural populations.
- 2. Pharmacological analysis of Arisaema tuber on curative effects against wound and tetanus.
- 3. Bibliographic data search on uses of medicinal plants in medieval and early modern times in Japan.
- 4. Reconstruction of history regarding use of medicinal plants by integration of biological and bibliographic data.

A medicinal plant *Arisaema thunbergii* subsp. *urashima* in Sumotojo castle

Recent Activities

- Ethnobotanical survey on distribution of medicinal plants in the genus *Arisaema* in ruins of fortresses used in the medieval Japan. TANESAKA E, J Medicinal Plant Res, 11: 338-344, 2017
- Compatibility of three bacterial strains in Agrobacterum-mediated transformation of monokaryotic mycelia of Flammulina velutipes. TANESAKA et al, J Crop Res, 63: 31-33, 2018
